Trimmers, Field and Brush Mowers Make Quick Work of Clearing Vegetation

Generac Pro makes the work quick and effortless for landscaping professionals

WAUKESHA, Wis. — Jan. 15, 2018 — Generac Pro Line can tackle any mowing project from trimming dense weeds to removing tall grass. Well-designed steel equipment makes it easy to cut through a variety of grass.

The Generac Pro Trimmer can take on the job and years of punishment. The heavy-duty trimmer has about five times more power than a standard hand-held trimmer. This gives you the power to easily take down waist-high weeds and grass with its 22-inch cutting width and thick, 175-millimeter cord. The Quick-Lock trimmer head makes it possible to change the trimmer cord in seconds by simply inserting replacement cord into the head and anchoring it in place via the unique gripping mechanism. The cord caddy lets the user carry replacement cord with them for quick cord replacements in the field.

The optional DuraBlade attachment makes it possible for the trimmer to take down thick brush and even woody material as thick as 3/8 inch. Large 16-inch wheels and three cutting heights provide you plenty of flexibility for any outdoor area.

For larger ground-clearing projects, landscapers can rely on Generac Pro Field and Brush Mowers. The Generac Pro Walk-Behind Field and Brush Mowers come in two models: one with

a 26-inch pivoting deck and a 16 horsepower Generac G-Force engine and the other with a 30-inch pivoting deck and a 18.67 horsepower engine.. The professional-grade G-Force engine and power steering capability allow for easy maneuverability. The units are built to last and are ideal for hilly terrain. Generac Pro's brush mower allows you to mow on slopes up to 20 degrees with ease. Power steering and hand brakes for each wheel put you in control as you navigate terrain. A comfortable working height is important, especially when traversing rough terrain. Controls are integrated into the grips for your operating comfort.

When the job is so big it requires a lawn tractor or even an ATV, the Generac ProTow-Behind Field and Brush Mower stands ready. Driven by the 18.67 horsepower G-Force engine, the 44-inch blades are able to mow as much as two acres an hour and take down saplings as thick as three inches in the process.

The Tow-Behind Mower's floating mulching deck is suspended from the frame so it can follow the contours of the terrain, minimizing scalping and protecting the drivetrain from damage. The blade also pivots when it hits a stationary object, protecting the blade as well as the engine and spindle from damage caused by rocks and other unseen obstacles. A chain debris guard stops material from flying forward into the tractor, ATV or operator. A remote control allows the operator to engage and disengage the blade from the driver's seat. Mowing height ranges from 4 to 7.5 inches and can be adjusted without tools.

The Generac Pro Line, including professional-grade portable generators, pressure washers, pumps, mowers and other property maintenance equipment, can be seen at The Rental Show 2019 booth (#4749)..

About Generac

Generac Power Systems, Inc. (NYSE: GNRC) is a leading global supplier of backup power and prime power products, systems and engine-powered tools. In 1959, our founder was committed to designing, engineering and manufacturing the first affordable backup generator. Fifty-nine years later, the same dedication to innovation, durability and excellence has resulted in the company's ability to expand its industry-leading product portfolio into homes and small businesses, on job sites, and in industrial and mobile applications across the globe. Generac offers single engine backup and prime power systems up to 2 MW and paralleled solutions up to 100 MW, and uses a variety of fuel sources to support power needs for our customers. We are proud to be named, in back-to-back years, the Frost & Sullivan 2014 and 2015 North American Natural Gas Generator Set Company of the Year. Generac also hosts Power Outage Central, the definitive source of U.S. power outage data, at Generac.com/poweroutagecentral. For more information about Generac and its products and services, visit Generac.com.
