Generac Mobile Expands Trash Pump Line

New 8-inch pumps handle the toughest jobs

BERLIN, Wis. – January 16, 2020 – Generac Mobile, a leader in mobile power equipment, introduces the newest additions to its trash pump line. The MTP8DZV 8” Venturi dry prime trash pump and the MTP8DZD 8” diaphragm dry prime trash pump round out Generac Mobile’s trash pump line with 4,184 gpm and total dynamic head of 187 ft. Both units can handle solids up to 3.38 in. (85.9 mm) in diameter and have 110-gallon fuel tank for up to 24-hour runtime. New to the 8-inch models is an optional cutter impeller to eliminate clogs and ragging on demanding municipal bypass projects.

With the lowest suction height in the industry and Final Tier 4 engines, Generac Mobile 4, 6 and 8-inch trash pumps are designed for ultimate performance, allowing for fast and efficient high-volume dewatering projects. Generac Mobile dry prime pumps feature a durable chassis and an optional sound attenuated enclosure for quiet operation and maximum versatility that can easily go from road construction to neighborhood project.

Durable and reliable Cornell® pump components mean less downtime on the job. These pumps have a Run-Dry™ feature to help protect against seal damage during dry operation.

The LOFA 750 Controller with backlit LCD display makes operation hassle-free and has your safety in mind with an electronic stop for emergency shutdown. For more information on the Generac Mobile trash pumps, visit generacmobileproducts.com.

About Generac Mobile

Generac Mobile is a leading manufacturer of mobile light towers, generators, heaters and pumps. A wholly owned subsidiary of Generac Power Systems (NYSE: GNRC), Generac Mobile is headquartered in Berlin, Wis., where it manufactures all product lines to withstand the rigors of rental yards, commercial construction jobsites and extreme environments. The company's innovative solutions help construction, infrastructure, military, disaster response, oil and gas, mining and event professionals optimize their operations with mobile light, power, water and heat solutions, providing safer worksites and streamlined workflows that maximize efficiency and profit.
